

EUOPRIS

Save the Date: 3rd International Correctional Research Symposium 2023

EuroPris and ICPA, in collaboration with the Portuguese Reintegration and Prison Service (DGRSP) will organise on **27-30 March 2023** in Porto, Portugal the 3rd International Correctional Research Symposium (CRS) on **Rehabilitating Reintegration: Research and Reflections on What Works.**

Exemplary topics:

What constitutes good or effective reintegration?

What does a 'successful' transition from custody to the community look and feel like?

What can we learn from research and practice in this regard?

Corrections are not only about the time spent in prison.

Since most of the people that we incarcerate are released and returned back to their communities at some point, a significant task of criminal justice agencies is also to focus on this eventual 'return'.

For this symposium, we welcome both evidence-based and practice-informed discussions of how meaningful re/integration can be achieved.
