

## 📄 Call for Papers: 19<sup>th</sup> Symposium on Electronic Crime Research

### TAKING BACK CYBERSPACE FROM THE CYBERCRIME PLEXUS SEPTEMBER 24 - 26, 2024

The 2024 Symposium on Electronic Crime Research (eCrime 2024) examines the economic foundations, behavioral elements, technological exposures, policy aspects and other dimensions that fuel the burgeoning global, multi-billion-dollar cybercrime plexus, at its 19th annual eCrime symposium on September 24 – 26, 2024 in Boston, Massachusetts, USA.

The Symposium is issuing a Call for Papers to announce the 19th annual edition of its peer-reviewed publishing conference – and to celebrate the beginning of its third decade combating cybercrime.

The selected peer-reviewed papers will be included in the conference's presentations along with numerous panels and talks from other researchers selected from industrial and academic research centers correspondent with the APWG.

Papers' topics may include but are not limited to:

- Artificial Intelligence as criminal co-conspirator – and as defensive collaborator
- Detecting and/or mitigating eCrime (e.g. online fraud, malware, phishing, ransomware, etc.)
- Behavioral and psychosocial aspects of cybercrime victimization – and prevention
- Case studies of current cybercrime attack methods, (e.g. phishing, malware, rogue antivirus programs, pharming, crimeware, botnets, and emerging techniques)
- Detecting/isolating cybercrime gangs' and attendant money laundering enterprises

Submissions should be in English, in PDF format with all fonts embedded, and formatted using the IEEE conference template, which can be found [here](#).

Submissions should also be anonymised, excluding author names, affiliations and acknowledgments.

Paper should not exceed 12 letter-sized pages, excluding the bibliography and appendices. Authors of accepted papers must present them and register at the event.

**Deadline:** Full paper registration/submission: June 23, 2024

See [here](#) for more information.
